

A DAY IN THE LIFE... RADIOTHERAPY PHYSICS

Emma McIntosh
Ninewells Hospital, Dundee

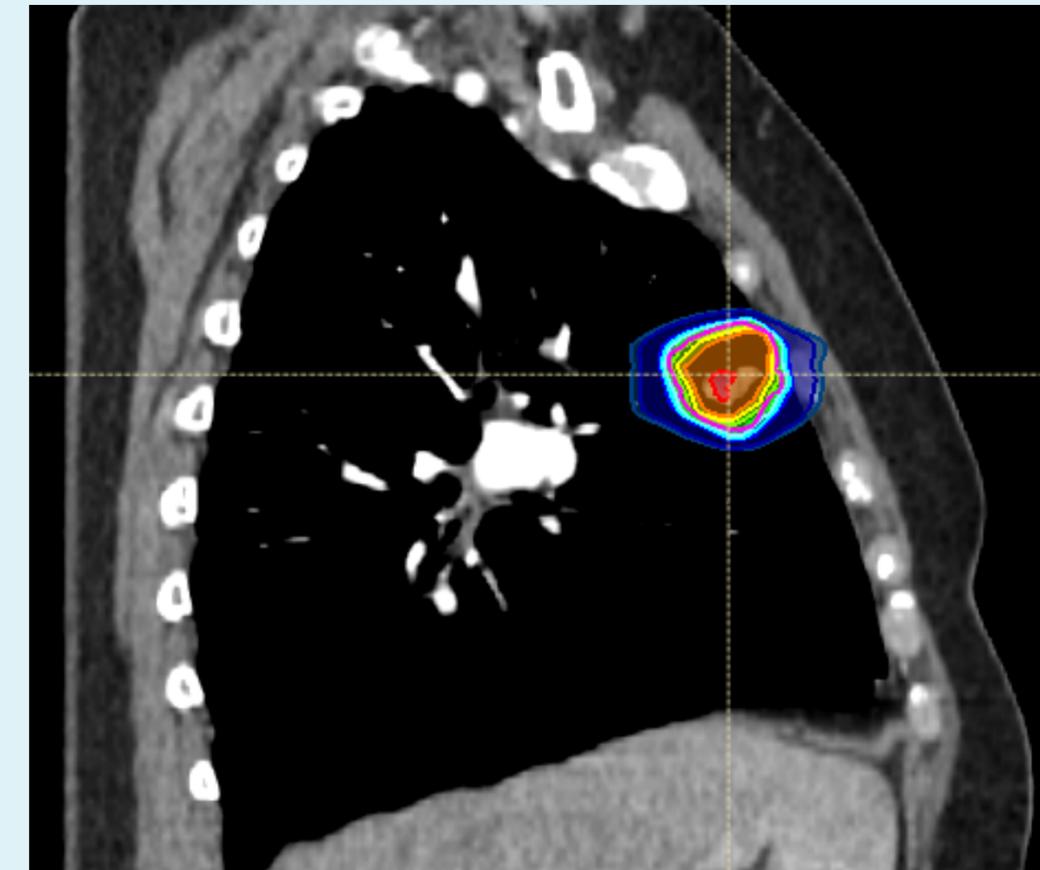

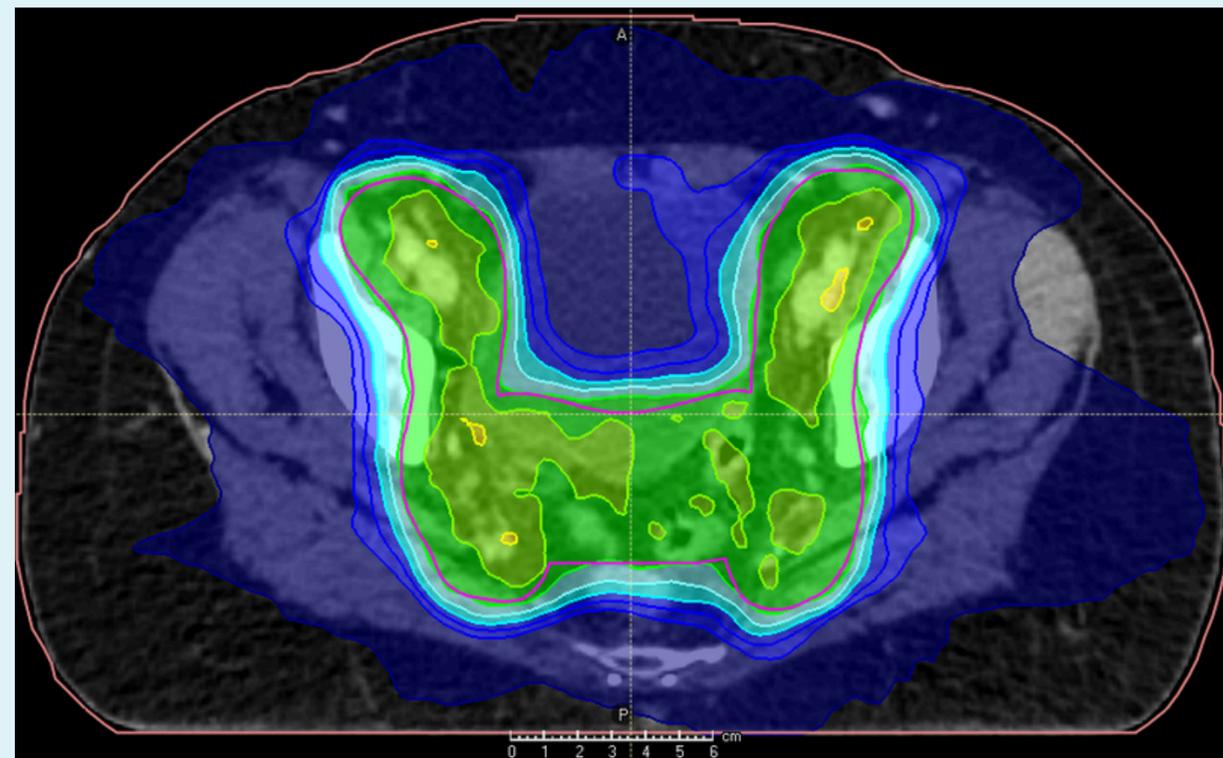

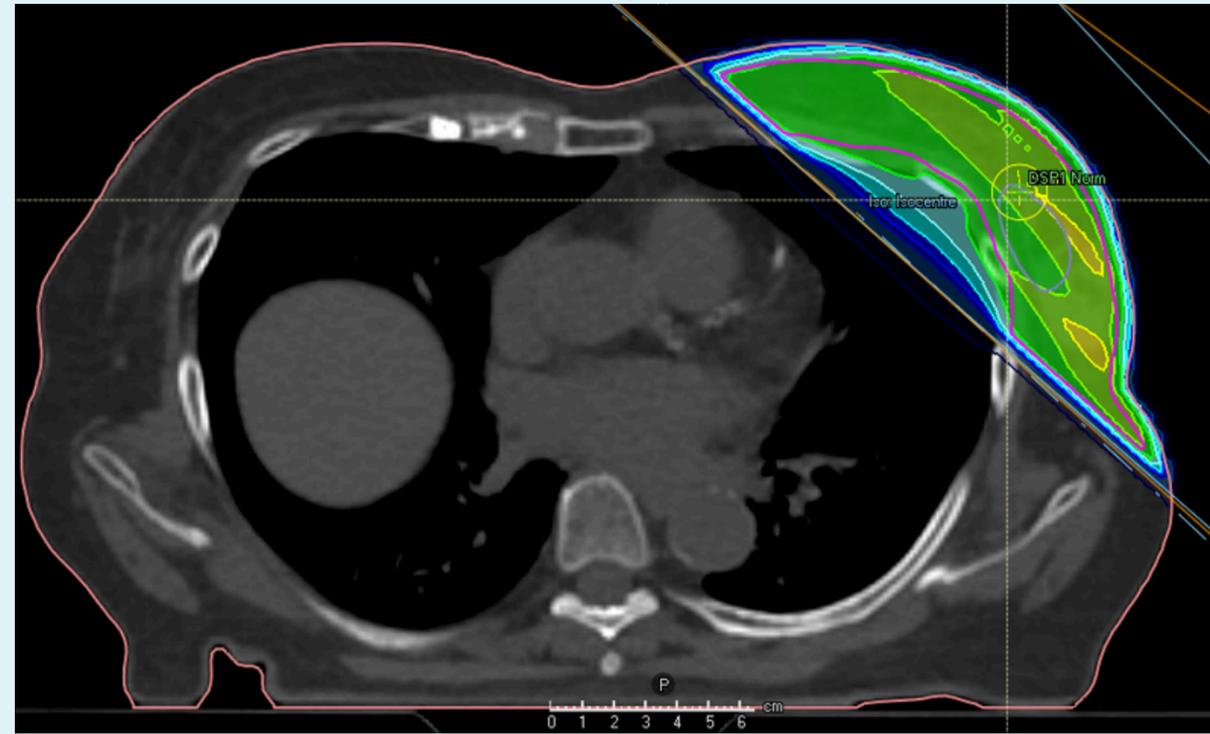

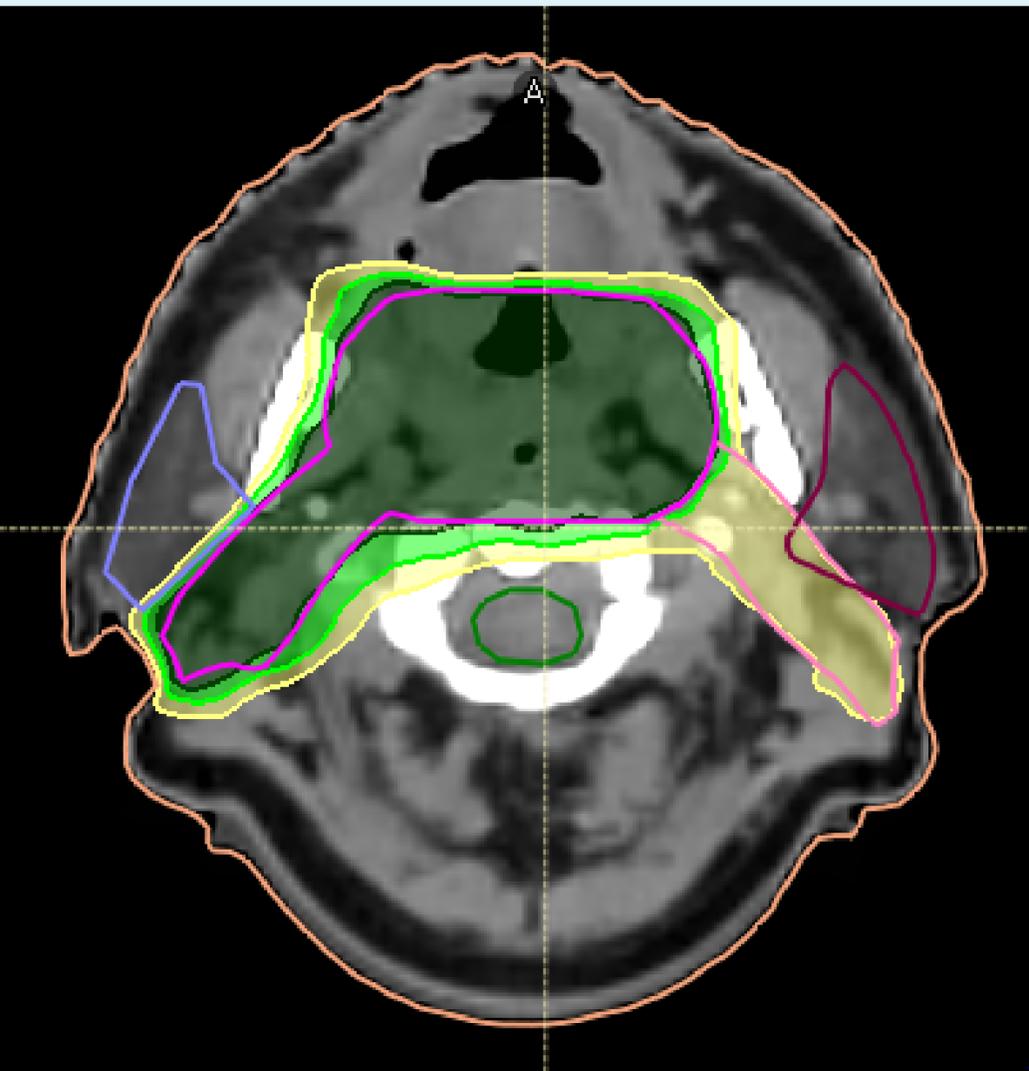

RADIOTHERAPY COVERS LOTS OF SPECIALITIES

- Quality Assurance
- Dosimetry
- Treatment Planning
- Brachytherapy
- Imaging
- Radiation Safety
- Computing

PROJECTS, RESEARCH, SERVICE DEVELOPMENT

- Non-routine work, always changing
- RT physics can be involved with:
 - New equipment, technology, techniques
- Help to continually improve the Radiotherapy service

EXAMPLE: SGRT

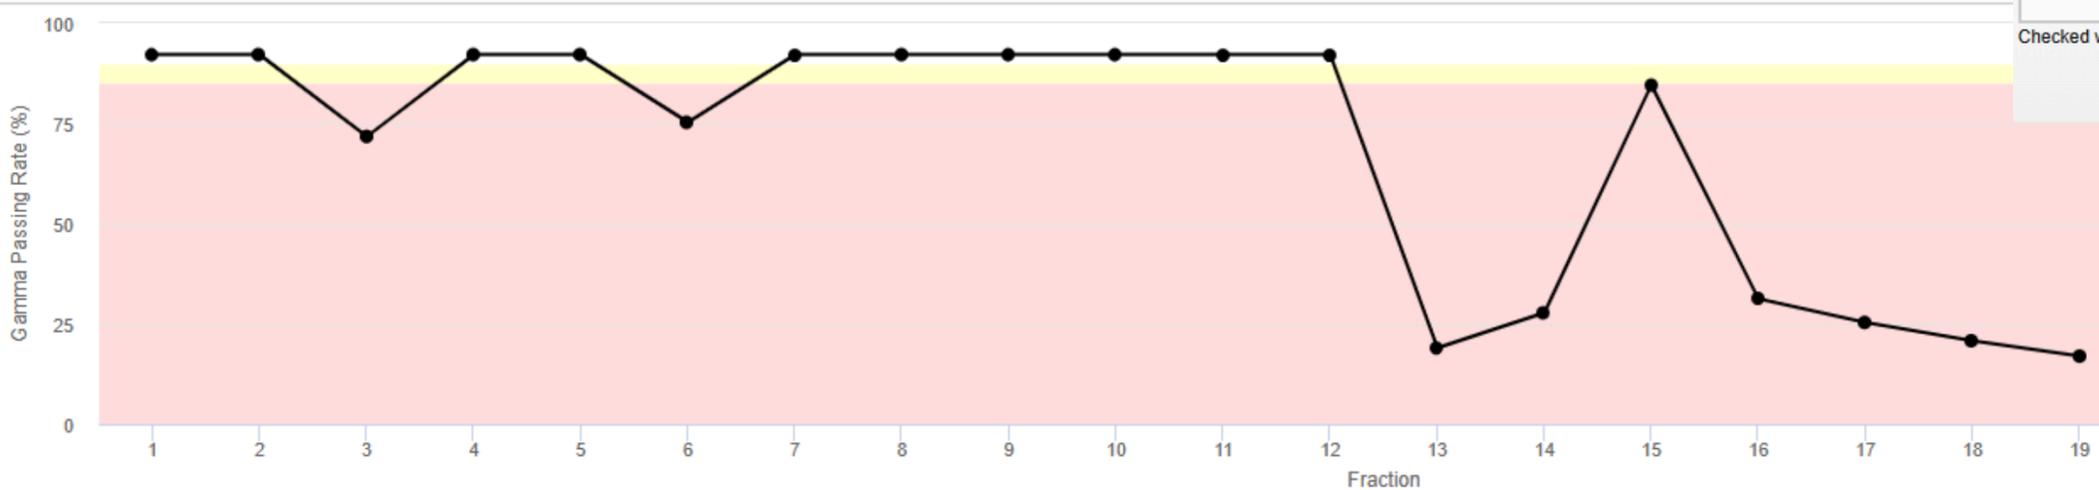

- Surface Guided Radiotherapy (SGRT)
- Uses optical cameras to monitor patient surface during set-up, imaging & treatment
- Part of MDT to commission and bring into use

EXAMPLE: MOBIUS FX

- Specialism Trainee Innovation Project
- MobiusFX Online Treatment Monitoring (OTM) software
 - Uses delivery log files from linac
- Intentionally introduce errors, evaluate sensitivity & specificity
